

TrackIt Pre-installation Checklist and Installation of TrackIt Drivers and TrackIt Software.

Installation issues are almost always Windows related, company Security Policy related or related to the computer hardware setup itself.

The TrackIt drivers are virtual COM port drivers and the computer must have a COM port installed.

To check this, look under Device Manager and see if "Ports" is listed. Installed devices are in alphabetical order:

If "Ports" is listed, then it is OK to proceed to the installation of the TrackIt drivers.

If "Ports" is not listed, then "Ports" will have to be installed.

See below for instructions for Port installation. Most users are able to install; but in some security conscious companies, an IT person may have to install Ports.

Installation of TrackIt Drivers and TrackIt software.

Note: It is very important that no dataloggers be plugged in during driver and software installation.

The TrackIt software, which includes the drivers, can be found on our website: http://monarchinstrument.com/Software/Track-It_Software.zip

It is in a .zip file which will need to be unzipped.

The un-zipped file folder contains Subfolders and files. Right click on CD_Start.exe and "Run as administrator":

15 Columbia Drive • Amherst, New Hampshire • USA 03031-2334 TEL: 603-883-3390 • FAX: 603-886-3300 • www.monarchinstrument.com • sales@monarchinstrument.com You will now have a Graphic User Interface:

Click on the "Install USB Driver " button to install the drivers. Once complete, click on the "Install Software" button to install the TrackIt Software.

When installed you will have a TrackIt Icon on your desktop:

You are now ready to plug in a datalogger and run the TrackIt software to setup your datalogger for recording. For the TrackIt Quick Start Guide see: http://www.monarchinstrument.com/pdfs/Quick_Start_Guide.pdf

Action>Add Legacy Hardware and left click:

	MAL DESCRIPTION OF A DESCRIPTION
≡ Sc	an for hardware changes
Ac	ld legacy hardware
e Pr	operties
E He	dp

You will see:

Welcome to the Add Hardware Wizard
This wizard helps you install driver software to support older devices that do not support Plug-and-Play and which are not automatically recognized by Windows.
You should only use this wizard if you are an advanced user or you have been directed here by technical support.
If your hardware came with an installation CD, it is recommended that you click cancel to close this wizard and use the manufacturer's CD to install this hardware.
To continue click Most

Click Next,

You will then see:

you knc a list.	ard can search for other hardware and automatically install it for you. Or, i w exactly which hardware model you want to install, you can select it from
What d	o you want the wizard to do?
C S	earch for and install the hardware automatically (Recommended)
In	stall the hardware that I manually select from a list (Advanced)

Select "Install the hardware that I manually select" then hit next.

the list below, select the type of	f hardware you are installing	
f you do not see the bardware ca	tegory you want click Show All Devic	-ec
,		
ommon hardware types:		
Sorts (COM & LPT)		1000
Printers		
SBP2 IEEE 1394 Devices		
SD host adapters		_
Security Devices		
3 Sensors		
Smart cards		_
Sound, video and game cont	rollers	-
An 11		•
		-

Scroll down for ports, then hit Next.

Select "Standard Port Types" under Manufacturer, then select "Communications Port" under Model; then click Next:

Select the manufactu	urer and model of your hardware device and then click Next. If you ains the driver you want to install, click Have Disk.
	Madal
Manufacturer	
Manufacturer (Standard port types)	Communications Port
Manutacturer (Standard port types) Hewlett Packard	Communications Port
Manufacturer (Standard port types) Hewlett Packard Microsoft	
Manutacturer (Standard port types) Hewlett Packard Microsoft Monarch Instrument	

Finally:

Add Hardware				
The wizard is	s ready to install your hardware			
Hardwar	e to install:
